No. 2, Report of the examination of such opium.

17. The public are hereby informed that in providing the in[illegible]nt of the opium manufactured at the Patna Factory and the opium manufactured at the [illegible]pur Factory for the year 1909-10, the same precautions have been taken as those which [illegible] observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug, when packed at the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the office of the Board of Revenue.

18. Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the office of the Board of Revenue. But, in accordance with established usage, under no circumstances will the Board of Revenue entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

By order of the Board of Revenue, L. P.,

H. L. STEPHENSON,
Secretary.

PUBLIC WORKS DEPARTMENT.

ESTABLISHMENT

The 23rd January 1911.

No. 18.—The following notification issued by the Government of India in the Public Works Department is republished for information:—

No. 3, dated the 18th January 1911.—The following is published for general information:—

No. 63—82E., dated Calcutta, the 18th January 1911.

RESOLUTION—By the Government of India, Public Works Department.

THE system of promotion in the executive and assistant classes for Royal Engineers serving in the Public Works Department (including the Railway Department) was revised by Public Works Department Resolution No. 154—173 E., dated 11th February 1910. The old graded system of promotion was replaced as in the case of Civil Engineers by an incremental scale of pay, with effect from the 8th March 1908, but the actual rates to be drawn under the incremental scale were fixed only for Royal Engineers already in the Department. These rates were arranged to correspond as nearly as possible with their expectations under the graded system of promotion. In paragraph 5 of the resolution it was stated that orders would be issued later in regard to the pay of future entrants. After careful consideration of the case in all its bearings, it has been decided that there is no justification for offering Royal Engineers higher rates of pay than the enhanced rates

sanctioned in 1908 for Civil Engineers of the Imperial Service. The Governor-General in Council, with the approval of His Majesty's Secretary of State for India, is accordingly pleased to rule that Royal Engineers, who enter the Department after the 11th February 1910, shall draw pay under the Civil scale recapitulated below, and in accordance with the rules laid down in Public Works Department Resolution No 675—694E, dated 24th April 1908, in so far as they apply to Civil Engineers of the Imperial Service—

[illegible] opium advertised for sale shall be paid for not later than by 3 30 P.M. of the fifteen[illegible] ay from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and, in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

10. Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots or of a different number of lots or chests, whether more or less, than the number of lots or chests ordinarily required to be included in each certificate or order.

13. With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually by Rs. 5 at a time until a bid is obtained; and the first *bonâ fide* bidder for a lot, after it has been offered for sale in the mode here described, shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 800 specified in the second of these conditions.

14. The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether fifteen lots, provided always that there remain a sufficient number of lots of the opium to complete the said fifteen.

15. In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or any adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

18. Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the office of the Board of Revenue. But, in accordance with established usage, under no circumstances will the Board of Revenue entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

MERCHANT SHIPPING.

The 21st January 1911.

No. 412-5—Under the provisions of sections 6*b* and 89 of the Merchant Shipping Act (57 and 58 Vict., Cap 60), the Governor-General in Council is pleased to direct that the forms referred to in the letter from the Board of Trade set forth below shall be adopted in British India for the registry of British ships under the said Act.

BOARD OF TRADE,
Marine Department,
7, Whitehall Gardens,
London, S. W.
3rd December 1910.

M. 27,036.

SIR,

I am directed by the Board of Trade to state, for the information of the Earl of Crewe that the form of certificate of survey (certificate of tonnage measurement, form Survey, 59) issued under Section 6 of the Merchant Shipping Act, 1894, has recently been revised, and the certificate of registry of a British ship and the transcript of register (Forms Registry 9 and 19) have in consequence been revised also.

It will be seen that the principal alteration consists in the insertion of a note stating the actual tonnage of the engine room spaces below the upper deck and the tonnage of the total spaces framed in above the upper deck for propelling machinery and for light and air. The object of this is to obviate the remeasurement of British vessels in ports of foreign countries (particularly the United States of America) whose tonnage regulations are not identical with those in force in the United Kingdom. The only other change in the forms consists in a slight alteration of the wording of note 2 (formerly the sole note).

In the interests of uniformity it is very desirable that the same forms and instruments should be used in connection with the registry of ships at all ports of British registry, and the Board would therefore suggest, for the consideration of the Secretary of State, that the forms accompanying this letter might be forwarded to the Indian authorities with a view to their taking steps to bring the new forms into use as soon as possible.

I am to add that, as the main alteration in the forms affects only steamers, there is no objection to the present stocks of forms being used up in connection with the registry of sailing ships, should such a course be desired in order to avoid waste.

I have, etc.,
WALTER J. HOWELL.

The Under Secretary of State,
India Office.

3. (*a*) Government reserve the power to sell separately the chests which are declared for shipment to China, and the chests which are not so declared;

(*b*) The chests sold for China will be marked in a distinguishing manner and covered by a special permit to be granted by Government;

(*c*) Subject to three months' notice of any change, the number of chests so marked and covered will not be more than 15,440 in 1911; and the number of chests to be sold for China and otherwise in each month will be notified before the commencement of the month's auction.

The following are the conditions of sale. The Board of Revenue reserve to themselves the right of altering all or any of these conditions after giving three months' previous notice :—

1. The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

2. The opium will be ordinarily offered for sale at an upset price of Rs. 800 per chest, and sold to the highest bidder above that price, except under the circumstances for which provision is made by clause 13 of these conditions of sale. The bids must advance by Rs. 5 at a time.

3. The sale shall commence at the hour of 11 A M of the day fixed by previous notification, and shall not be continued after the hour of 5 P M, but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A M., and so on until the whole of the remaining lots are disposed of; or if the whole quantity advertised shall not be sold on the day appointed, the Board of Revenue may dispose of the lots which remain on hand at a future sale.

4. Each lot shall contain five chests.

5. A Promissory Note for a sum, calculated according to the scale, noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such Promissory Notes shall be redeemed on the part of the purchasers at this office by Bank of Bengal receipts, or by substitution of other public securities of the Government of India, on or before 3-30 P.M., in the afternoon of the fifth day after the sale, provided it does not fall on a Saturday; if it falls on a Saturday, the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as the Board of Revenue shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

DEPOSIT.

When the amount bid is less than Rs. 1,200 per chest, Rs. 200 per chest.
On bids of Rs 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 300 per chest.

And so on, Rs 100 being added to the deposit for every bid additional to the extent of Rs 400.

6. The said Promissory Notes shall be absolutely payable on demand, and the amount thereof shall be absolutely forfeited upon such default as aforesaid, and the amount thereof shall not go or be credited in reduction of any loss, charges or expenses thereby incurred, but shall be recoverable whether such re-sale shall or shall not, or whether there shall be a loss on such re-sale or not.

7. The Promissory Notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P M of the fifth day following the day of sale, or 1-30 P.M., if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

8. No tender of money, Bank of Bengal receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause 5 on the 5th day following the day of sale, will be afterwards accepted. Provided always that money so subsequently tendered may be taken in payment of the said Promissory Note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. 5 and No. 6.

9. The opium advertised for sale shall be paid for not later than by 3-30 P M of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M; and, in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

10. Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots or of a different number of lots or chests, whether more or less, than the number of lots or chests ordinarily required to be included in each certificate or order.

11. No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or

his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

12. The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand render at the time a deposit either in Government of India Notes, Bank of Bengal receipts, or Government securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these conditions

13. With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually by Rs. 5 at a time until a bid is obtained ; and the first *bonâ fide* bidder for a lot, after it has been offered for sale in the mode here described, shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 800 specified in the second of these conditions.

15. In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

16. The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the office of the Board of Revenue :—

No 1, Certificate of the opium advertised for sale;

No 2, Report of the examination of such opium.

17. 14. The officer receiving the application may either reject the application under section 80 (3) or may admit it. If the application is admitted, a local inquiry will be held. A date will be fixed for that inquiry, and the applicant or his agent will be informed of this date. Notices in Form 19 will be sent to the tenants (if any) whose names are entered in column 12 of List A. In addition a notice in Form 19 will be served in each village concerned. This local inquiry will be held on the day and time specified in the notice. Such of the parties and their witnesses as attend and may desire to give evidence shall be examined, and such inspection of the land concerned as is considered necessary shall be made. In the record of this inquiry it shall be clearly stated which of the tenants were examined; and if any offered themselves for examination and were not examined, their names and the reasons for not examining them shall be recorded. IT has been brought to the notice of the Government of India that the words "shall not be bound to serve" in proviso (*b*) in the Form of Agreement for the engagement of lascars in India are liable to be misunderstood, and are sometimes construed as permitting lascars employed on deck to serve voluntarily on voyages to ports on the east coast of America north of 38 degrees north latitude between the 1st day of October in one year, and the 31st day of March in the succeeding year. In order, therefore, to make it clear that deck hands are not permitted to serve on such voyages between the dates mentioned above, even if they volunteer to do so, the Governor-General in Council is pleased to direct that the word "shall not serve" shall be substituted for the words "shall not be bound to serve" in clause (*b*) of the said proviso.

2. In the preceding August the Inspector-General will intimate to each Range Deputy Inspector-General and Superintendent of Police the number of vacancies allotted to each district to be filled by candidates appointed direct, and will call for three nominations for every two vacancies. He will also indicate what limitations, if any, are to be observed as to the appointment of any particular section of the community.

The notice states that applications will be received up to the end of September; that printed forms of application, P. C. APPENDIX III.

(See paragraph 16 of the Regulations.)

LEAVE.

1. The following is a summary of the principal regulations relating to the leave admissible to officers appointed to the Indian Forest Service by the Secretary of State from the United Kingdom

Long Leave.

2 Furlough and special leave with allowances (*see* paragraph 6) are admissible to an aggregate maximum amount of six years during an officer's service. The amount of furlough "earned" is one-fourth of an officer's active service, and the amount "due" is that amount less any enjoyed.

3. Furlough without medical certificate can, if due, be generally taken after eight years' active service, and again after intervals of not less than three years' continuous service. It is limited to two years at a time.

4. Furlough on medical certificate may be granted (*a*) to an officer who has rendered three years' continuous service, for not more than two years, but capable of extension up to three years; and (*b*) to an officer who has not rendered three years' continuous service, up to one year in any case, and up to such longer period, if any (but not exceeding two years in all), as the officer may have furlough "due" to him.

5. The allowances admissible during furlough are:—

(1) During the first two years of furlough with medical certificate and during so much of furlough with medical certificate as may be "due"—half average salary, subject to certain maximum and minimum limits.

(2) After the expiration of the period for which the foregoing allowances are admissible—one quarter of average salary, subject to maximum and minimum limits.

6. Special Leave may be granted at any time for not more than two intervals of six years' service; allowances, calculated as during furlough, for the first six months only, whether taken in one or more instalments.

Short Leave.

7. Privilege Leave is a holiday which may be granted for any part of the time that an officer has been on duty without allowances. It accumulated up to three months earned by 33 months' duty. While on privilege leave an officer retains a lien on his appointment, and receives allowances at the rate received if on duty. An interval of not less than [illegible] periods of absence on privilege leave.

Privilege leave may be prefixed to furlough, special leave or retirement without allowances. The whole period of leave thus taken is called combined leave. Combined leave may not be granted for a period exceeding six months, nor, except on medical certificate, may it be extended.

8. Subsidiary Leave in India for a minimum of 10 days, without allowances, is granted to an officer proceeding on or returning from leave or retirement, to enable him to reach the port of embarkation or to return to his station. It is admissible only at the end and not at the beginning of combined leave.

9. Short Leave is also granted to enable officers to appear at examinations.

10. Extraordinary Leave without allowances may be granted in India, but except in certain specified cases, only when no other kind of leave is admissible. It may be granted in continuation of other leave.

General Rules.

11. Leave of absence, whether on furlough or on privilege leave, cannot be claimed as of right, and is given or refused at the discretion of Government.

12. After five years' continuous absence from duty, an officer is considered to be out of the employment of Government.

13. When leave allowances other than privilege leave pay are paid at the Home Treasury, or in a Colony where the standard of currency is gold, rupees are converted into sterling at the rate of exchange fixed for the time being for the adjustment of financial transactions between the Imperial and Indian Treasuries, unless any other rate has been exceptionally authorised. But for the present the rate of conversion is subject to a minimum of 1*s.* 6*d.* to the rupee. Privilege leave pay when issued from the Home Treasury (this is only admissible when privilege leave is combined with other leave) is converted at 1*s.* 4*d.* to the rupee.

APPENDIX IV.

(See paragraph 16 of the Regulations)

1. The following is a summary of the principal pension rules applicable to officers of the Indian Forest Service appointed by the Secretary of State from the United Kingdom.

An officer of the Indian Forest Service is eligible for a pension on voluntary retirement after completing 20 years' qualifying service or attaining the age of 55 years. If at an earlier date he is compelled to retire from the service through ill-health, not occasioned by irregular or intemperate habits, he becomes eligible for an invalid pension or a gratuity according to the length of his service.

The amount of pension or gratuity is regulated as follows :—

After a service of less than 10 years, an invalid gratuity not exceeding one month's emoluments for each completed year of service.

(c) The sum which will thus accumulate to the credit of an officer to be his absolute property, to be handed over to him unconditionally on quitting the service; or, in the event of his death before retirement, to his legal representatives.

APPENDIX V.

GENERAL PHYSICAL REQUIREMENTS.

Note.—These Regulations are published for the convenience of candidates and in order to enable them to ascertain the probability of their coming up to the required physical standard. But it must be clearly understood that the Secretary of State reserves to himself an absolute discretion to reject as unfit any candidate whom he may consider, after hearing the opinion of his medical advisers, to be physically disqualified for the public service; and that his discretion is in no respect limited by these Regulations.

1. A candidate must be in good mental and bodily health, and free from any physical defect likely to interfere with efficient performance of duty.

2. In the examination of candidates the Medical Board will apply the following table of correlation of age, height, and chest girth:—

Age.	Height without shoes.	Chest.	
		Girth when expanded.	Range of expansion.
	Inches.	Inches.	Inches.
19 to 20	62½ and under 65	35	2
	65 " 68	35	2
	68 " 70	35½	2
	70 " 72	36	2
	72 and upwards	36½	2½
21 and upwards	62½ and under 65	35	2
	65 " 68	35½	2
	68 " 70	36	2
	70 " 72	36½	
	72 and upwards	37	

3. *Measurement of Height.*—The candidate will stand with his feet together, and the weight thrown on the heels rather than the feet. He will stand erect without rigidity, and with the shoulders touching the standard; the chin will be depressed so that the middle level under the horizontal bar, and the height will be noted. No fixed limit of height is imposed.

4. *Measurement of Chest.*—The candidate will be required to raise his hands above his head, and to place the measuring tape round the chest, the posterior upper edge touching the [illegible] and its anterior lower edge the upper part of the [illegible] to hang loosely by the side, and care will be taken that the shoulders are not thrown upwards or backwards so as to displace the tape. The candidate is then directed to empty his chest of air as much as possible. This is done by [illegible] with the lips as long as sound can be produced. The tape is adjusted during the process, and when the minimum measurement is reached the candidate will then be directed to inflate his chest to its utmost capacity. This measurement will likewise be noted. The girth with the chest full and the range of expansion between the minimum and the maximum will thus be obtained.

5. The hearing must be good.

6. The speech without impediment.

7. The teeth in good order, *i.e.*, decayed or broken teeth must be stopped or crowned, and deficient teeth replaced by artificial teeth where necessary for effective mastication.

8. The chest must be well formed, the lungs and heart sound.

9. Rupture, hydrocele, varicocele, varicose veins in a severe degree, or other condition likely to cause inefficiency will disqualify a candidate, unless such condition is cured by operation.

10. The limbs, feet, and toes must be well formed and developed, with free and perfect motion of all the joints.

11. A candidate must have no congenital malformation or defect likely to interfere with efficiency.

12. A candidate must not be the subject of chronic skin disease.

13. Evidence of previous acute or chronic disease pointing to an impaired constitution will disqualify.

14. Candidates may, not more than two years before they are qualified to compete for an appointment, undergo a preliminary examination by the Medical Board, which meets at the India Office every Tuesday, under the following conditions:—

(*a*) Applications must be addressed to the Under-Secretary of State, India Office, Whitehall, London, accompanied by a fee of two guineas, and a statement of the candidate's age.

(*b*) Candidates must pay their travelling expenses.

(*c*) Candidates considered to be unfit by the Medical Board at this preliminary examination are not bound to accept its opinion, but may, *at their own risk*, continue their studies, with the knowledge that they will have to submit themselves for a final medical examination by the Medical Board, prior to their appointment.

(*d*) On the other hand, it must be distinctly understood that the preliminary examination by the Medical Board is held solely for the candidate's information, and that if after that examination he is reported to be apparently fit, he has not on that account any claim to be accepted as physically fit when he presents himself for the final Medical examination, upon which alone his acceptance or rejection will depend. Candidates may be considered fit for the Service at the preliminary examination, but may be found at the final examination to be unfit, either on account of some physical defect which did not exist or passed undetected at the preliminary examination, or for other reasons.

REGULATIONS AS TO THE STANDARD OF VISION FOR THE INDIAN FOREST SERVICE.

1. If myopia in one or both eyes exists, a candidate may be passed, provided the ametropia does not exceed 2·5 D, and with correcting glasses, not exceeding 2·5 D, the acuteness of vision in one eye equals $\frac{6}{6}$ and in the other $\frac{6}{9}$, there being normal range of accomodation with the glasses.

2. Myopic ametropia does not disqualify a candidate for service, provided the lens cylindrical lenses required to correct the error of refraction. ...ness of vision in one eye when corrected being equal to $\frac{6}{6}$ ... normal range of accommodation with the correcting ...ogressive disease in the choroid or retina.

CHAPTER III.—LANDLORDS' IMPROVEMENTS.

13. *Section 80.*—An application for the registration of landlords' improvements may be presented to the Collector of the district, or to the officer in charge of the subdivision, in which the land benefited by the improvement is situated, or to any Assistant or Deputy Collector who may be specially appointed by Government to receive such application. The application shall, as far as practicable, be in the form (Form 1) specified in Schedule I appended to these rules, and the requisite information shall be submitted, along with the application, in the form of List A, appended to the said Form 1.

Application for registration of improvements: to whom to be presented.

13A. Alternative methods of filling up columns 12 to 16 of List A are provided. The first method is intended for cases in which only a small number of holdings are benefited, and the second for cases in which the whole village or a considerable proportion of the holdings is benefited. It will be open to the applicant, in the first instance, to select the method which appears to him more appropriate; but if he selects the second method, the revenue officer may, if he thinks fit, require List A to be filled up in the first method. If the revenue officer admits the application he will at the same time pass orders to the applicant to submit notices in Form 19 on tenants or villages concerned, in sufficient number to meet the requirements of these rules.

14. The officer receiving the application may either reject the application under section 80 (*5*) or may admit it. If the application is admitted, a local inquiry will be held. A date will be fixed for that inquiry, and the applicant or his agent will be informed of this date and of the approximate hour when the enquiry will be held. Notices in Form 19 will be sent to the tenants (if any) whose names are entered in column 12 of List A. In addition a notice in Form 19 will be served in each village concerned. In this notice will be specified the date and approximate hour when the inquiry will be held in that village, and the tenants concerned therein will be directed to attend the inquiry. The notice will be published locally by proclamation and beat of drum, and will be fixed up in the presence of not less than two persons in some conspicuous place in the village. The service of the notice must be attested by at least two residents of the village (or, in the case of a *becharpar* village, of a contiguous village), on the back of the duplicate notice. Special care must be taken to ensure that with each notice is appended a correct copy of List A of the extracts therefrom which refer to the village or tenant addressed in the notice.

The expense of sending and publishing notices under this rule and under rule 16 shall be borne by the applicant.

15. The Collector or subdivisional officer who received the application may transfer the case to the file of another officer empowered to receive such applications. If it is not so transferred, he may either make the local inquiry himself, or he may direct it to be made by an officer not below the rank of Sub-Deputy Collector. When the officer who receives the application is not the Collector or a subdivisional officer, he may in a similar manner transfer the case or direct a local inquiry, with the consent of the Collector or subdivisional officer. This local inquiry will be held on the day and time specified in the notice. Such of the parties and their witnesses as attend and may desire to give evidence shall be examined, and such inspection of the land concerned as is considered necessary shall be made. In the record of this inquiry it shall be clearly stated which of the tenants were examined; and if any offered themselves for examination and were not examined, their names and the reasons for not examining them shall be recorded. The inquiring officer must make an inquiry in each village the lands of which are affected by the improvement.

Extract from the Proceedings of the Government of India in the Department of Education (Census) under date Calcutta, the 20th March 1911.

RESOLUTION.

In certain provinces such as Madras and the Punjab the custom of making periodic estimates of the population, founded on more or less accurate data, is of very old standing, but the first systematic attempt to obtain information regarding the population of the whole of India, based on an actual counting of heads, was made between the years 1867 and 1872. But even then, many of the Native States, including Hyderabad, Kashmir, the States of the Central India and Rajputana Agencies and those attached to the Punjab, were left out of the count. This Census, moreover, was non-synchronous; the arrangements were seldom very elaborate, and in some of the more remote tracts it was admittedly carried out in a very rough and imperfect manner. The experience gained, however, was valuable, and it paved the way for the first regular Census on the modern system, which was carried out on the 17th February 1881. On this occasion the operations were extended to all the provinces and states in India, as the term was then understood, except Kashmir and various small remote tracts. The count was a synchronous one, taken in the manner to be presently described, except in certain forest and desert tracts where counting by night was impracticable and the regular procedure was modified to a varying extent; in some places a simplified schedule was employed and the final revision of the record was carried out by day, while in others this process was dispensed with. In the latter case the schedules did not, as elsewhere, show the persons actually present in each house on the night of the Census but those who ordinarily resided there.

On the 26th February 1891, the second general Census was taken on lines very similar to those of the previous one, but more elaborate arrangements were made to ensure completeness; the non-synchronous area was smaller; and Upper Burma, which had meanwhile been acquired, was included in the operations,

as well as Kashmir and Sikkim. The third Census was taken on the 1st March 1901. Its operations embraced for the first time a large part of the Baluchistan Agency, the Bhil country in Rajputana, the settlements of the wild Nicobarese and Andamanese and certain outlying tracts on the confines of Burma, the Punjab and Kashmir. The non-synchronous area was again reduced, and even where it was not found practicable to effect a final revision, the enumeration was ordinarily carried out on the standard schedule. In some of the newly added areas, however, no detailed enumeration was possible, and the population was estimated with reference to the ascertained number of houses or the returns of the tribal headmen.

2. The fourth general Census of India was taken on the night of the 10th March 1911, or ten years and nine days after the previous one. The date was chosen partly with reference to the age of the moon, so that the Census staff might be able to go about their work by moonlight, and partly with the object of avoiding as far as possible religious festivals and fairs and the dates regarded as auspicious for marriage ceremonies or for bathing in the sacred rivers. Unfortunately there was a serious recrudescence of plague which interfered considerably with the enumeration in some parts of the country and caused a large temporary decrease in the population of certain towns, such as Nagpur, Gaya and Jaipore, many of whose inhabitants had left their homes. In parts of Northern India heavy rain fell while the final Census was being taken. This Census included within its scope the whole of Baluchistan (except Kharan), the Agencies and tribal areas in the North-West Frontier Province and several remote tracts in Burma which had not previously been dealt with. In a few tracts where the previous count had been non synchronous, a synchronous Census was effected and in a few others an actual enumeration took the place of an estimate.

The standard procedure to be followed was laid down by the Census Commissioner for India in a Code, on the basis of which the Census Superintendents of the different provinces and states prepared their local instructions after such modifications in matters of detail as were needed in order to meet local requirements. The general scheme provided for the division of the whole Empire into blocks, each of which (except in the non-synchronous tracts where they were larger) contained from thirty to fifty houses and was in charge of an Enumerator. Above the block came the circle, a compact group of from ten to fifteen blocks, or about 500 houses, under a Supervisor, who was responsible for the work of all the Enumerators in his circle. Circles were grouped, according to tahsils, taluks or other recognized administrative divisions, into charges under Charge Superintendents, who exercised general supervision over the Census operations and tested a large proportion of the work of their subordinates. The total strength of the Census staff was about two millions.

3. In Europe the Census record is usually prepared by the head of the family, but this is impracticable in a country where the great majority of the people are illiterate. As a rule, therefore, the schedules were filled in by the Enumerators. But as it was impossible for them to enter all the required particulars for all the persons in their blocks in the course of a few hours on the night of the Census, and as owing to their generally low standard of education, the entries made by them required careful revision by the superior Census staff, it was arranged, as on previous occasions, to have the bulk of the work done beforehand. During February the Enumerators wrote up the Census schedules for all the persons ordinarily resident in their blocks; and the record thus prepared was checked and corrected by the Supervisors and Charge Superintendents. On the 10th March between 7 P.M. and midnight, the Enumerators again went round their blocks and brought the entries into accordance with the facts at that time by striking out the names of people who had died or gone away, and entering the necessary particulars for fresh arrivals and newly-born infants. Elaborate arrangements were made, for the enumeration of persons who, on the night of the Census, were travelling by rail, river or road, or were otherwise absent from their homes.

On the morning of the 11th March the Enumerators of all the blocks in a circle met the Supervisor at a place previously arranged, and filled in a form showing the number of occupied houses and of persons (males and females) in

each block. The Supervisor, after testing these figures, prepared from them a summary for his circle which he transmitted to his Charge Superintendent. The latter did the same for his charge, and reported the result to the District Officer. The charge summaries were then combined into the district total, which was telegraphed to the Provincial Superintendent and the Census Commissioner for India. Careful arrangements were made for checking the additions at each stage and for preventing the omission of the figures for any block or circle.

4. The general results of the Census according to the Provisional totals are exhibited in Tables A to C appended to this Resolution. The total population of India as thus ascertained is 315,001,099 *viz.*, British territory 244,172,371 and Native States 70,828,728. To the total increase of 20,640,043 since 1901 British territory contributes 12,547,564 and the Native States 8,092,479. These figures are purely provisional and are liable to correction after detailed tabulation. But past experience shows that they are sufficiently accurate for all practical purposes. In 1901 the difference in the whole of India between the population according to the provisional totals and that finally ascertained was only 94,355 or ·03 per cent.

Variation per cent. since 1881.

INDIA	+13·2	+2·4	+7·0
Provinces	+11·2	+4·7	+5·4
States	+20·2	−5·1	+12·9

The proportional variations at each of the last three Censuses are given in the margin. In considering them, allowance must be made for the greater accuracy of the more recent enumerations and for the fact that at each Census prior to the present one, part of the apparent increase was due to the inclusion of new areas within the scope of the operations. It has been estimated that, after allowing for artificial changes, the actual gain in the period 1881—1891 was 9·8, and in the succeeding decade 1·5, per cent. At the present Census there has been a further elaboration of method, which has, it is hoped, led to greater accuracy in the entries regarding caste, occupations and the like; but except in a few outlying tracts, the omissions from the record were already so few in 1901 that there was no appreciable room for improvement. The areas now dealt with for the first time have a population of 1,731,099. After allowing for this, the net increase at the present census comes to 6·4 per cent.

5. Until the full statistics have been tabulated it would be premature to attempt to say how far the variations which have occurred are due to natural causes and how far to migration, or to appraise the relative importance of the various factors which have influenced the growth of population. It may be mentioned however, that, shortly before the commencement of the decade, there had occurred two widespread and disastrous famines, which not only caused a heavy fall in the birth-rate but also, with their sequelae—cholera, fever and other epidemics—were responsible for a mortality (chiefly in the Native States) of about five millions in excess of the normal. A very large proportion of these deaths were of 'bad lives,' which would otherwise have swollen the mortality roll of the years immediately succeeding. It follows that, at the commencement of the decennium 1901-1911, the conditions were favourable to a comparatively rapid growth of population. On the one hand, after several years of impaired fertility, a high birth-rate was to be anticipated, and on the other, a relatively low death-rate. From an agricultural point of view the period in question was, on the whole, fairly prosperous. Though there were a few local famines, there were no widespread calamities like those of 1897 and 1900; and in most parts, taking one year with another, the crops were equal to, or above, the average. There was steady progress in industrial development, in the construction of railways and in the provision of facilities for irrigation.

But a new and terrible disease had now to be reckoned with. Breaking out in Bombay City in 1896 the plague had already in March 1901 caused a recorded mortality of about half a million. Since then it has continued its ravages, especially in Bombay and Upper India. The mortality from this scourge rose from 284,000 in 1901, to 1,316,000 in 1907. It then fell to well under

200,000 in 1908 and 1909. In 1910 it was 509,000. The total number of deaths from plague during the decade was nearly six-and-a-half millions, of which over one-third occurred in the Punjab, and two-fifths in the United Provinces and Bombay. In the Punjab and United Provinces, malaria was also very prevalent. The reported mortality from fevers in the United Provinces in 1908 was nearly two millions, and greatly exceeded the total number of deaths from plague in the whole decade. Elsewhere, in spite of a certain amount of plague, the decade was on the whole a healthy one.

A brief note by the Census Commissioner for India on the principal features of the decade from the point of view of the Census in the main British provinces is appended.

6 The Governor General in Council desires to acknowledge the services rendered by the Census Commissioner, the Superintendents of Census Operations, the district officers, and the various grades of local and village officials both under the British Government and in the Native States. His thanks are more especially due to the large number of private individuals, belonging to all classes of society, whose diligent co-operation with the officers of Government has rendered it possible to bring to a successful issue the census of a population far greater than that enumerated in any other country in the world and to publish the result within nine days from the date on which it was taken.

Order.—Ordered that a copy of the Resolution be forwarded to all local Governments and Administrations, to the Departments of the Government of India, and to the Census Commissioner for India, and that it be published in the Supplement to the *Gazette of India*.

Secretary to the Government of India.

Brief note on the conditions prevailing during the decade in the main British Provinces.

Bengal.—During the first four years the province as a whole enjoyed fair agricultural prosperity. Then followed four years of depression and then again two years of good crops. In 1906 high floods, followed by drought, caused a local famine in Durbhanga. In 1907 the monsoon ceased early and caused a partial failure of the winter rice throughout the province: some minor relief operations were found necessary in four districts. In 1908, when the monsoon again ceased prematurely, ten districts were more or less seriously affected, while in two famine was declared. Since 1901 about thirteen hundred miles of railway have been constructed. The mortality was high in three years, but on the whole the decade has been a healthy one and the reported births have exceeded the deaths by more than two millions. Plague has appeared yearly and has taken heavy toll in several districts of Bihar. The recorded mortality from this cause in the years 1901—1910 inclusive was 596,000. There are two large currents of migration, the one from Chota Nagpur to the tea gardens of Eastern Bengal and Assam, and the other from the United Provinces to Calcutta and other industrial centres.

Bombay.—The crops were very poor in Gujarat in 1901-02 and 1904-05, in the Deccan and Karnatak in 1905-06, and in most parts of the Province in 1907-08; but on the whole, the agricultural conditions of the decade were favourable, especially in Sind. There was a steady development of industry and trade up to the year 1908-09, when the high price of cotton caused a temporary set back; but in 1909-10 there was a rapid recovery, and the trade at the port of Karachi was greater than it had ever been before. About a hundred miles a year were added to the railways of the province, and there was a steady, though slow, extension of irrigation facilities. So far as the material condition of the people is concerned, the conditions, except perhaps in Gujarat, were favourable to a fairly rapid increase in the population. But until about two years ago, plague continued to be very prevalent. The reported mortality from it during the ten years 1901—10 was 1,313,000.

Burma.—Burma, in spite of its fertile soil, was formerly very sparsely populated. But it has developed rapidly during British rule, and each succeeding Census has disclosed a considerable increase of population. In 1901, apart from the generally high rate of growth, the main feature was the large increase in the deltaic districts, where the fertile waste land was rapidly being reclaimed by immigrants from Upper Burma and Madras. By that time, however, most of the best land in these districts had been cleared; and a slackening in the rate of increase was therefore to be anticipated. On the other hand, the completion of irrigation schemes in Shwebo, Mandalay, Kyaukse, Yamethin and Minbu has encouraged migration to these five districts of Upper Burma. The agricultural conditions have on the whole been satisfactory, both in Upper and Lower Burma, especially during the last two years. The oil industry has developed, trade has increased, and the demand for labour has become greater than ever. The state of the public health has been satisfactory. The registration of births and deaths is not yet very accurate, but so far as they go, the figures indicate a large excess of births over deaths. There is believed to have been a considerable increase in the already large number of immigrants from Madras.

Central Provinces and Berar.—These provinces suffered severely in the two great famines of the previous decade. Since 1901 in spite of some local crop failures, there has been a steady recovery amongst the agricultural classes. In 1907 there was a partial failure of the monsoon, which was most serious in the Jabbulpore and Nerbudda Divisions, but, on the other hand, in several years bumper crops were harvested. The area under cotton, which of late years has been a most profitable crop, has expanded considerably. There has been a steady increase in the demand for labour, owing partly to the good seasons, partly to the increased expenditure on roads, railways and canals, and partly to the development of industries, such as cotton ginning and the quarrying of manganese ore. The emigration to the tea districts of Assam has probably been counterbalanced by immigration to meet the growing local demand for labour. In spite of about a quarter of a million deaths from plague, which has been worst in Nagpur and the Berar districts, the vital statistics show a marked excess of births over deaths.

Eastern Bengal and Assam.—The crops were generally good throughout the decade, but some damage was caused by the high floods of 1905-06. The general tendency to high prices of food grains prevailing at this time throughout India was accentuated locally by these floods and by the gradual expansion of jute cultivation to the exclusion of rice. The tea industry, which was suffering from over-production at the commencement of the decade, has entered on a new era of prosperity. Between the years 1901 and 1909 the total outturn has risen from 167 to 230 million pounds, and the tea garden labour force (excluding Jalpaiguri) from 645 to 756 thousand. The opening of the Assam Bengal Railway and the extension of the Eastern Bengal State Railway from Golakganj to Gauhati have greatly improved the internal lines of communication. The material condition of the Province is one of considerable prosperity. The state of the public health has been good. The disastrous epidemic of Kala Azar has disappeared from the Brahmaputra Valley. The Province has escaped the ravages of plague.

Madras.—Since the calamitous famine of 1877 the Madras Presidency has been unusually free from serious failures of the crops The Deccan districts were affected by scarcity in 1897 and 1900, but on a comparatively small scale. Since 1901 the crops have on the whole been good. There was local scarcity in three districts in 1905 and in one in 1908, but this was not sufficient to affect materially the number of births or deaths There were epidemics of cholera in the years 1906 to 1908, but otherwise the public health was good In every year the number of births reported considerably exceeded the deaths. There an extensive emigration (mostly temporary) from the southern districts to Ceylon and from the north of the Presidency to Burma There is also a growing demand for Madras labour in the Malay States. Until the birthplace statistics of these places have been compiled it will be impossible to gauge accurately the real rate of growth.

North-West Frontier Province.—Though sparsely inhabited, the area at present fit for cultivation had for the most part been taken up previous to 1901. There has been very little increase during the decade in the total cropped area, but the proportion of it which is irrigated has risen from 25 to 30 per cent. On the whole the harvests have been good, but they were poor in the first year of the decade and again in 1907, when prices of food grains rose to a high level. Communications by road and railway have been much improved. The public health has been fairly good The registration of vital statistics is not complete, but so far as they go, the figures indicate a considerable excess of births over deaths.

Punjab.—In the first two years of the decade the crops were bad The Delhi division and the Kangra district suffered most in 1901-02 and the Rohtak and Hissar districts in the year following. Since then, save only in 1907-08, the agricultural conditions have been uniformly favourable. There has been a large extension of irrigation in the canal colonies, the total length of canals and distributaries having been increased by 618 miles; and both here and in the dry western districts there has been a marked increase in the area under cultivation Prices of food grains and cotton have risen The decade has thus been one of considerable agricultural prosperity. Trade also has been good; and there has been a great improvement in railway communications, over a thousand miles of new line having been constructed On the other hand, except in the dry western districts, the state of the public health has been deplorable. Plague has been present throughout the decade, and has been responsible in all for about two million deaths, of which nearly one-third occurred in 1907. Since that year it has been far less virulent. Heavy as has been the mortality from plague, it has been barely half that from fevers. Malaria has been terribly prevalent, especially in the irrigated tracts in the eastern and central districts. It was worst in 1908 and in the first three years of the decade. The vital statistics indicate a net decrease of about 2½ per cent in the natural population of the Province.

United Provinces.—The first four years were a period of returning prosperity after the famines of 1897 and 1900. Then bad crops in 1905, followed by a poor rabi in 1906, led to famine in Bundelkhand and the south of the Agra Division. Prosperity was restored by a good kharif and rabi, but in 1907 the monsoon failed entirely in August, causing a severe famine, which continued until a good kharif was harvested in 1908. From that time to the present, conditions have everywhere been favourable. Prices of food grains were unusually high during the last five years. There has been a good demand for labour, even in famine years, and wages have generally been high. The emigration to Calcutta and other industrial centres is considerable. The area under cultivation is almost stationary, but the irrigated area is increasing, and the aggregate length of canals has been increased by about 14 per cent. The decade has been marked by general industrial development; the outstanding features are the rapid growth of the cotton industry on the one side and the equally rapid decline of indigo on the other. Considerable additions have been made to the railways and metalled roads. The state of the public health, which was moderately good in the early years of the decade, has since gone from bad to worse. Plague accounted in all for about one and-a-half million deaths. The mortality from malaria was even more serious, and in 1908 alone, nearly two million deaths from fever were recorded.

Table A.

Total population and variation since 1881.

The population returned at previous Censuses has been corrected, as far as possible, in order to allow for subsequent interprovincial transfers. The largest changes are those necessitated by the partition of Bengal. The population of Manipur State (T[illegible]l 284,465—males 139,632, females 144,833) which was included under the head British territory in 1901, has now been included under the head Native States. The tribal areas in the North-West Frontier Province have also been shown under the latter head. Sikkim, which in 1901 was classed under Bengal States, is now shown separately.

The areas newly included within the scope of the enumeration are noted below :—

Table C.

Population of principal towns and variation since 1891.

In some towns such as Nagpur, Gaya and Indore, where plague was prevalent at the time of the Census, many of the inhabitants were absent from their homes and the population shown in this table is far less than it would otherwise have been. A fresh enumeration will be effected in some of these towns later on, when the plague has disappeared.

PART II.—VESSELS ARRIVING AT PORTS IN BRITISH INDIA.

2. The master of every vessel arriving at any port in British India from a port beyond India shall—

(*a*) if the vessel has on board any person suffering or suspected to be suffering from any of the diseases enumerated in the preamble, or

(*b*) if any case or suspected case of any of those diseases has occurred on board within the twelve days immediately preceding the arrival of the vessel, or if unusual mortality has occurred among rats, or

(*c*) if the vessel has come from a port infected with yellow fever, or

(*d*) if the vessel has come from an infected port within twelve days of leaving such port, or

(*e*) if the vessel has had such communication with an infected vessel or with a vessel from an infected port as might have infected her with any of the diseases in question,

hoist a signal which shall be—

by day Flag L of the Commercial Code, which is a square flag of yellow and black borne quarterly, and

by night three lights, at a height of not less than 20 feet above the hull of the ship, which shall be arranged, at a distance of not less than six feet apart, in the form of an equilateral triangle, and of which the light at the apex of the triangle shall be white and the lights at the ends of the base shall be red,

and shall report every such case or death that may have occurred from any of the causes enumerated above, or in the case of a vessel not carrying a duly qualified doctor any death from any cause, to the pilot or other boarding officer at the earliest opportunity,
and shall also comply, on arrival at such place as may be appointed in this behalf by the Local Government with such regulations as may be made by the Local Government in regard to—

(*i*) signalling the name of the port from which the vessel has come,

(*ii*) stopping at a particular place,

(*iii*) refraining from communication with the shore, and

(*iv*) taking measures for giving effect to the present regulations.

3. If the vessel be at anchor within port limits when such disease first breaks out or such death occurs, the master shall hoist the signals specified in rule 2.

4. The pilot or other boarding officer shall promptly report the circumstances of the case to the Port Officer, who shall immediately forward any report so made or give notice of any signal hoisted to the Port Health Officer.

5. (1) When any vessel carrying a duly qualified medical man, on board of which no suspicious case of sickness and no unusual mortality among rats has occurrred within the twelve days immediately preceding, is within sight of a port in British India, the master may intimate the fact by signal.

(2) Such intimation shall ordinarily be accepted by the Port Officer; and if so accepted, the Health Officer need not visit the vessel, which may be given pratique at once.

PART III.—BERTHING OF VESSELS.

6. (*a*) If the number of deaths from or cases of the diseases enumerated in the preamble, with the exception of plague and yellow fever, does not exceed two, the vessel will not be prohibited from taking up the usual place of anchorage in the harbour or port, except that she may not enter the docks without the written permission of the Health Officer, and the passengers and crew not suspected of having any of the diseases in question need not (except in the case of pilgrim and emigrant ships) be detained on board pending the inspection of the Health Officer. The master of the vessel shall be responsible that no one of the passengers or crew, except those referred to above, is allowed to leave the vessel before the Health Officer, and shall prevent the landing of infected bedding, clothes, or other personal effects from on board, or any reasonable cause to consider likely to be infected.

(*b*) If the number of cases or deaths within the previous twelve days has exceeded two, or when from their occurrence on pilgrim or emigrant ships or for other special reasons further precautions may be deemed advisable, the pilot, or in his absence the master, shall keep hoisted by day or night as the case may be, the signals prescribed by regulation 2, and shall anchor the vessel in the place appointed for the purpose and shall not allow any of the passengers or crew to leave the vessel until pratique is granted.

7. If a case of yellow fever or of plague or unusual mortality among rats has occurred on board, the vessel shall not take up the usual place of anchorage pending the visit of the

Health Officer; in the meanwhile the vessel shall stop at such place as the Local Government may by order provide.

8. So long as the signals prescribed by regulation 2 are shown, no *tindal* or other person in charge of or navigating any boat shall, without the permission of the Health Officer, attempt to take it alongside such vessel. A police boat shall be placed on guard to see that this regulation is duly enforced.

PART IV.—INSPECTION OF VESSELS.

9 Whenever the Health Officer receives the notice referred to in regulation 4, he shall without unnecessary delay proceed on board and examine the vessel, and the master shall give him every facility for the examination of the passengers, crew, personal effects, cargo, and any part of the ship the Health Officer thinks necessary. The Health Officer may require a declaration on oath from the medical officer (if any) of the vessel or from the master or from both, whether any death or sickness from an unknown or suspicious cause or any case of any of the diseases enumerated in the preamble has occurred on board the vessel either during the voyage or before her departure, and with reference to plague, whether any unusual mortality has been observed among rats. If the Health Officer is satisfied that such deaths as may have occurred were not due to any of the causes enumerated in the preamble, he shall permit the vessel to proceed to anchorage and to discharge passengers and cargo without any further restrictions. If he is not so satisfied, he shall proceed as provided in these regulations. The inspection by the Health Officer will ordinarily take place between sunrise and sunset.

10. As a result of every inspection the Health Officer shall classify the vessel as infected, suspected or healthy.

11. On the completion of the inspection prescribed by regulation 9, such of the passengers and crew as are found to be free from any of the diseases in question and unlikely to carry infection shall be allowed to land. All baggage, personal effects and cargo, except such articles as the Health Officer is entitled to disinfect, may also be landed.

12. If a case of any of the diseases enumerated in the preamble occurs on any vessel after she has entered dock or has been moored at a wharf, the master shall forthwith cause information thereof to be given to the dock master or superintendent of the wharf, who shall communicate the information to the Health Officer (through the Port Officer) and to the Superintendent of Police, and shall be responsible that the sick person shall be isolated as much as possible, and that free communication with the wharf is stopped until the Health Officer has inspected the vessel.

13. In the case of vessels of the Royal Navy and foreign vessels of war any medical inspection to be made may be carried out by the naval medical officer in the presence of the Health Officer.

PART V.—REMOVAL OF THE SICK.

14. When on inspection the Health Officer considers it necessary in order to prevent the spread of disease, he shall take the measures indicated in Part VI of these rules as the case may be.

15. The removal of passengers is not to be enforced in the case of persons bound for an onward port unless under the clearest necessity, and in every such case a special report explaining the reasons for the action taken must be submitted by the Health Officer to the Local Government.

16. The Port Health Officer shall inform the Municipal Health Officer in all cases in which he arranges for the conveyance of a patient to a sanitarium or hospital or other place within municipal limits, and shall furnish the Municipal Health Officer with the address of any private residence to which he permits the removal of a patient.

17. Where small-pox is the disease on account of which the vessel is deemed to be infected, the Health Officer shall offer, without charge, vaccination or revaccination to all persons willing to be operated upon, and shall cause to be vaccinated, if their guardians or those in charge of them consent, all children below 10 years and over 6 months of age who do not bear marks of vaccination or of small-pox. In the case of plague inoculation may similarly be offered free of charge to all willing to be inoculated.

PART VI.—MEASURES TO BE TAKEN IN THE CASE OF HEALTHY, INFECTED, AND SUSPECTED VESSELS.

18. Vessels classed by the Health Officer after inspection as healthy, shall be given free pratique.

PART VI-A.—SMALL-POX, CHICKEN-POX, MEASLES, SCARLET [illegible] TYPHUS CHOLERA.

19. In the event of a vessel being passed either as infected or suspected on account of any of the above-mentioned diseases, the Health Officer—

(1) shall not enforce the removal from the vessel of any person or persons bound for an onward port unless under the clearest necessity as provided for in regulation 15;

(2) may arrange for the conveyance of any person suffering or suspected to be suffering from such disease to a sanitarium or hospital, unless the sick person or his friends can make adequate provision elsewhere of which the Health Officer must satisfy himself;

(3) shall either himself undertake, or direct the master of the vessel to undertake the destruction or disinfection of all clothing, bedding and other articles of personal use which have been used by any person suffering from any of the above-mentioned diseases, and are or are likely to have been soiled with infective matter or to retain infection;

(4) may when a vessel with one or more of the above-mentioned diseases on board has passengers or crew in a filthy and unwholesome condition, cause the clothing and personal effects of such persons to be disinfected before allowing them to leave the vessel;

(5) may, in the case of undecked craft, direct the disinfection, or in special cases the destruction, of food-stuffs which have been exposed to contamination and are considered likely to be infected;

(6) may direct the disinfection, cleansing and painting of any portion of the vessel that has actually been exposed to contamination or is in a filthy or insanitary condition, and may prohibit the discharge of bilge water or water ballast within port limits;

(7) may in the case of cholera, direct the master to have the bilges and water tanks emptied and cleaned outside port limits.

(1) All persons on board shall be medically examined as prescribed in regulation 9.

(2) All persons suffering from plague shall immediately be disembarked under the directions of the Health Officer and isolated in the camp or hospital, whether ashore or afloat, appointed by the Local Government for the purpose.

(3) Other persons shall also be disembarked, if possible, and shall either be kept under observation* during a period which shall not exceed five days dating from the arrival of the ship and which may or may not be followed by surveillance* of not more than five days' duration or may, at the discretion of the Health Officer, be subjected to surveillance only during a period which shall not exceed ten days if the place of destination is free of plague.

(4) The Health Officer may permit such healthy members of the crew as are required to be present on board for the care and safety of the vessel, to remain on board but subject to surveillance. Such persons shall not land, without the permission of the Health Officer, until pratique is given.

(5) Such soiled linen, wearing apparel and articles belonging to the crew and passengers as are, in the opinion of the Health Officer, infected, shall be disinfected.

(6) All parts of the vessel which have been occupied or frequented by plague patients shall be disinfected and any other parts of the vessel that, in the opinion of the Health Officer, are infected, shall be disinfected.

(7) The rats on board shall be destroyed, either before or after discharge of the cargo, in either case as quickly as possible, and in any case within a maximum time of forty-eight hours in such manner as to avoid damage to merchandise and to the ship's plating and engines. In the case of ships in ballast this process must be carried out as soon as possible, before embarking cargo.

Paris Convention, article 33.

(8) Passengers arriving by an infected ship are entitled to obtain from the Health Officer a certificate showing the date of their arrival and the measures taken as regards themselves and their baggage.

21. When the measures prescribed in regulation 20 have been duly taken in respect of any vessel the Health Officer shall, by written order, grant pratique provided that, if a case of plague or of illness suspected to be plague occurs on board subsequent to the grant of the above certificate, the certificate shall become invalid and the vessel again become subject to the requirements of the regulations regarding infected vessels

Paris Convention, article 22.

22. In respect of suspected vessels arriving at a healthy port the following measures shall be taken:—

(1) All persons on board shall be medically examined as prescribed in regulation 9.

* "Observation" means isolation either on board the ship or in a sanitary station appointed for the purpose before the grant of pratique. Passengers under "surveillance" are not isolated; they receive pratique at once and are at liberty to proceed to their destinations, but the authorities at those places are informed of their coming and they are subjected to medical examination for such period as may be fixed in these rules.

(2) The crew and passengers may, at the discretion of the Health Officer, be subject to surveillance, the duration of which dating from the arrival of the ship shall not exceed five days The crew may also during that period (or, if the vessel is in port for less than five days during the time she remains in port) be prevented from leaving the ship, except on duty on such conditions as the Health Officer may consider permissible.

(3) The destruction of rats may be ordered at the discretion of the Health Officer, and if ordered shall be carried out in the terms of regulation 20 (7).

(4) All soiled linen, wearing apparel and personal effects of the crew and passengers which are or are suspected to be infected, shall be disinfected by moist heat at a temperature of not less than 100°C.

(5) All parts of the vessel which have been occupied or frequented by plague patients shall be disinfected; and any other parts of the vessel that, in the opinion of the Health Officer, are infected, shall be disinfected.

23. When the measures prescribed in regulation 22 and in clauses (1), (5) and (6) of regulation 20 have been taken in respect of any vessel, the Health Officer shall, by written order, grant pratique.

24. In the case of healthy vessels arriving at a healthy port pratique shall ordinarily be given at once as provided for in regulation 18, but the Health Officer may, in his discretion, if special circumstances appear to him to require it, impose any or all of the following measures:— Paris Convention, articles 23-24.

(1) medical examination as prescribed in regulation 9.

(2) disinfection of soiled linen, etc., as prescribed in regulation 20 (5);

(3) destruction of rats as prescribed in regulation 20 (7); but the process of deratisation must not occupy more than 24 hours;

(4) he may also subject the passengers and crew to surveillance for a period not exceeding five days from the date of departure from the infected part.

In the case of an otherwise healthy vessel which has cleared from an infected port, or which has had communication with a vessel which has left an infected port, the crew and passengers may be subjected by the Health Officer, in his discretion, to surveillance during a period which shall not exceed five days reckoned from the date of such clearance or communication whichever is the more recent. The crew may during the same period be prevented from leaving the ship except on duty.

25. In exercise of the functions imposed upon him by regulations 9, 10, 20 and 22, the Health Officer shall— Paris Convention, articles 29-30

(*a*) attach due importance to the presence on board the vessel of a medical officer and to the provision of apparatus for disinfection by means of saturated steam and for the destruction of rats, and

(*b*) shall take into account the sanitary or insanitary, and roomy or crowded condition of the vessels.

26. If in the case of any vessel making a passing call, the communication with the shore is restricted to the landing of passengers, mails or goods, the Health Officer may, in his discretion, enforce the provisions of regulation 20, 22, or 24, as the case may be, to such extent only as may in his opinion be necessary for the purpose of controlling the actual communication with the shore.

Provided (*a*) that any persons on board the vessel whom the Health Officer has reason to believe to be suffering from plague shall be landed and kept under observation.

Provided also (*b*) that ships from an infected place that have been disinfected and have undergone adequate sanitary measures, shall not, on their arrival in another port, be subjected to these measures a second time if no case has occurred since the disinfection was performed and if they have not called at an infected port A ship which has merely disembarked passengers and their baggage or mails, without having been in communication with the shore, shall not be regarded as having called at the port. Paris Convention, articles 32.

27. The Health Officer shall whenever requested furnish the master, the ship-owner or the ship-owner's agent with a certificate stating that measures of rat destruction have been carried out and giving the reasons why they were resorted to.

28. The foregoing regulations shall not prevent the transhipment [illegible] restrictions to be imposed by the Health Officer in connexion therewith of passengers, mails or goods between vessels which have not been granted pratique.

29. If any case of plague occurs among any group of persons who are being kept under observation, the patient shall be isolated or sent to a hospital, and the other persons shall continue to be detained and segregated as aforesaid for a period not exceeding five days from the date on which the group became free from plague. The clothes and effects of the patient and of such persons as have been in contact with the patient shall be disinfected at the discretion of the medical officer in charge.

30. The medical officer in charge of any place appointed for the isolation of any persons under these regulations may, in his discretion, by written order, direct that any person who is kept there under observation shall be allowed to depart and shall be subjected to surveillance.

1. If the system of surveillance to which any person is subjected on shore requires his daily attendance before a medical officer, the Health Officer may, by written order, exempt such person from such attendance on being satisfied that he may be relied upon to send in a prompt report if he should fall sick.

32. Persons subjected to surveillance shall submit to, and comply with all directions as to medical supervision or otherwise, which may be given by written order of a medical officer appointed by the Local Government in this behalf.

PART VI-C.—YELLOW FEVER.

Paris Convention, article 132.

33. In the case of vessels which have started from or touched *en route* at a port infected with yellow fever, the following procedure shall be observed:—

(1) The vessel shall be anchored at sea not less than a mile from the land at low water (in the case of the Port of Calcutta at Diamond Harbour). The visit of the Health Officer shall be made during the day as early as possible.

(2) Any person suffering from yellow fever, if in the first four days of the disease or if there is any doubt about the duration of the disease, shall be protected from the approach of mosquitoes by means of curtains, and, if possible, the sick should be treated on board for at least four days. All passengers in perfect health (with normal temperature, etc,) may be landed, special precautions being taken to prevent mosquitoes having access to them, and shall be kept in quarantine for seventeen days in mosquito-proof houses.

(3) If it is necessary to land the sick, the most minute precautions to prevent mosquitoes reaching them shall be taken, including a mosquito-proof cabin on the launch, mosquito-proof ambulances and a mosquito-proof ward in an isolation hospital.

(4) The crew of the vessel should be required to sleep in airy places, preferably on deck, and should be protected by mosquito curtains.

(5) The ship shall be cleared of mosquitoes by the systematic fumigation,* under efficient supervision, of every cabin, store-room, alley-way and hold.

(6) All water in which mosquitoes could breed should be emptied into the sea and all drains flushed by means of a hose. The bilge should be pumped out or oiled. The drinking water tanks should be emptied to get rid of larvæ, fresh water being taken and the tanks completely filled so as to drown any adult mosquitoes which may be present in them.

(7) Provided, if no case of yellow fever has occurred during the voyage only such of the above measures shall be carried out as are considered by the Port Health Officer necessary in the circumstances of the case.

(8) No ship shall leave the anchorage for the purpose of taking up her berth until the measures described in paragraphs (5) and (6) have been carried out.

PART VI-D.—SLEEPING SICKNESS.

34. In the case of a vessel having on board a person suffering, or suspected to be suffering, from sleeping sickness, the person or persons shall not be permitted to land without the specific written permission of the Health Officer.

35. The Health Officer may, pending the receipt of written instructions from the Local Government, permit the landing of such persons only if arrangements can be made for their strict isolation on shore.

Note.—The Health Officer should make a careful examination for enlargement of the lymphatic glands, particularly those in the triangles of the neck. The pulse rate should also be taken. To confirm the diagnosis gland-juice should be taken and examined for the presence of trypanosomes.

PART VI-E.—JIGGER.

36. In the case of a vessel having on board any person or persons suffering from jigger—

(1) the Health Officer shall carefully examine every person on board, and any person or persons found to be suffering may be removed to hospital for treatment;

(2) the clothes of infected persons shall be disinfected, and the Health Officer may, in his discretion, order the disinfection of the clothes, bedding, etc., of all persons on board.

* Sulphurous acid is probably the best gas to use.

(3) any part of the vessel likely to harbour jigger fleas shall be thoroughly washed with a watery solution of kerosene oil emulsion or tar acid emulsion;

(4) the ballast of such vessel, if of earth or sand, shall not be landed without the permission, in writing, of the Health Officer, who, if he considers it necessary, may order that it shall be discharged into the sea/river at such places as shall be appointed for the purpose by the Local Government.

PART VII.—GENERAL

Vessels.

37. The master of any vessel coming under these regulations shall comply with all directions which the Health Officer may consider necessary under the foregoing rules.

38. The master of any vessel who may object to submit to the foregoing regulations may put out to sea again, provided that objection has been taken before there has been any communication, except by signal or through the port authorities, between such vessel and the shore or with any other vessel in port. Goods may be landed from such vessels after precautions have been taken to isolate the ship, crew and passengers and on condition that such information as the Health Officer may require regarding the mortality among rats is duly supplied: Passengers may be disembarked at their own request, on condition that they submit to all the measures prescribed by the local authorities.

39. In the event of any vessel putting back to sea, the Health Officer shall intimate the fact by telegraph to the next port of call.

Persons.

40. All persons removed to hospital or kept under observation at any place shall obey and conform to the rules, regulations and orders for the time being in force at such hospital or place and shall be liable to pay all such charges for food as for the time being may, under the sanction of the Local Government, be made against them.

41. When a suspected case of any infectious disease is removed from a vessel at an Indian port, the Health Officer shall report the confirmation or otherwise of the diagnosis, by telegraph, to the Health Officer of the next port of call if that port is in British India, Ceylon or the Straits Settlements. In other cases a note shall be made on the bill of health stating the nature of the suspected infectious disease, and the precautions taken in connection therewith.

Dead Bodies.

42. Disposal shall be as follows:—

(1) If death occurs on board a vessel before entering port limits, the body shall, except there are special reasons to the contrary, be buried at sea in not less than nine fathoms of water, in such manner as shall secure its immediate sinking and remaining below the surface.

(2) If death occurs during the day on board a vessel within port limits the ensign and house flag, if there is one, are to be immediately lowered half-mast and kept in such position from sunrise till sunset as long as the body remains on board. If death occurs between sunset and sunrise, one red light is to be hoisted at the peak, half-mast high.

(3) The master of the vessel shall cause the death of a person on board to be intimated forthwith to the police, either by letter or otherwise, and shall forward to the Port Officer a written report as soon as possible after the occurrence, in which all the circumstances attending the death must be fully detailed. Intimation of the death shall also be sent to the Port Health Officer.

(4) No dead body shall be removed from a vessel within port limits without the permission of the police, which shall not be given until the Health Officer has certified that the death is not due to an infectious disease. Such body shall be buried on shore or at sea as may be decided by the Port authorities in consultation with the Health Officer.

Disinfection.

43. All disinfection prescribed by these regulations shall be carried out as otherwise specifically provided for, in the manner prescribed in the Appendix hereto.

(*a*) such further medical examination and disinfection as the Health Officer may consider necessary have been made under regulation 44, and

(*b*) a fresh bill of health has been given to the master under that regulation.

(*b*) the baggage and personal effects of such persons as were in immediate contact with such member of the crew shall be disinfected, and the names of such persons shall be given to the medical officer or master of the vessel for supervision on the voyage

APPENDIX A.

INSTRUCTIONS FOR DISINFECTION.

Paris Convention, article 177 (note).

1. Personal effects, such as rags, bandages, papers and other articles without value which, in the opinion of the Health Officer, are deemed likely to carry infection, should be destroyed by fire.

2. Under-clothing, bedding, wearing apparel, mattresses, carpets, etc., which are contaminated or *suspected*, and other articles to be disinfected, should be exposed for 15 minutes to saturated steam—under pressure if possible—at a temperature of not less than 100° C. (212° F.) care being taken that the steam shall reach all parts of each article to be disinfected.

3. *Disinfecting Solutions*—

(*a*) Solution of corrosive sublimate of ½ part in 1,000 with the addition of 2 parts in 1,000 of hydrochloric acid or 160 grains of chloride of soda in one gallon. The solution should be coloured with aniline dye or indigo. It should not be placed in metal vessels.

(*b*) A 5 per cent solution of pure crystalized carbolic acid, or 5 per cent of crude commercial carbolic acid free from tar oils, in a warm solution of soft soap.

(*c*) Freshly prepared lime-wash,*

(*d*) Tar acid emulsion in such strength as shall be recommended by the Port Health Officer.

4. *Special instructions to be observed in the employment of disinfecting solution.*—The linen, clothing and articles soiled by the excreta of patients should be soaked in the solution of corrosive sublimate. The solution of pure carbolic acid and the solution of soap and carbolic acid are equally suited to the purpose. The articles should remain in the solution for at least six hours.

Articles which cannot be subjected to the temperature of 212° F. without injury, as leather goods, wooden articles stuck together with glue, felt, velvet, silk, etc., should be washed with a disinfecting solution or should be exposed for two hours to the fumes of Formaldehyde in a fume chamber; coins can be disinfected with the solution of soap and carbolic acid. Persons engaged in nursing the sick should wash their hands and faces with one of the carbolic solutions. The carbolic solutions will be useful more particularly for disinfecting articles such as metal or instruments, which can neither be subjected to a temperature of 212° F. nor placed in contract with corrosive sublimate. Slaked lime is particularly recommended for disinfecting excreta. Expectorated matter should be burnt.

5. *Disinfection of ships on which plague has occurred among human beings or rats.*—All rats on board shall be destroyed by means of sulphurous anhydride. The cabins, etc., occupied by the sick or those suspected to be suffering from plague shall, at the discretion of the Health Officer be treated with a solution of corrosive sublimate or other suitable disinfectant and thoroughly cleansed with soap and water. In the case of pneumonic plague preliminary disinfection with corrosive sublimate solution shall be invariably carried out.

6. *Disinfection of the hold of an infected ship.*—The bilge-water shall be pumped out, and the hold washed with sea water, a sufficient quantity of a solution of corrosive sublimate or other suitable disinfectant being subsequently thrown in at the discretion of the Health Officer. The bilge-water shall not be pumped out when the vessel is in harbour without the written consent of the Health Officer.

---

* The lime wash should contain 20 per cent of lime, and may be prepared as follows:—Take 4 pounds of good quick-lime and slake it by moistening it gradually with about half a pint of water. When the operation is completed the resulting powder must be kept in an air tight vessel in a dry place.

For use, the quantity of slaked lime obtained from 4 pounds of quick-lime should be placed in a convenient vessel and water added to make one gallon.

APPENDIX B.

1. There shall be a space of at least three feet between any part of the vessel and the wall of the dock or wharf

2. All ropes and hawsers connecting the vessel with the dock or wharf shall be furnished with a circular concave-convex rat guard at least four feet in diameter fitting tightly, with the concavity towards the wharf, on the rope or hawser, and so fixed that no part of the margin of the guard shall be less than 24 inches from the rope or hawser.

3. To prevent rats reaching the ship by means of a gangway, as few gangways shall be used as possible; all gangways shall be raised at night; and a watchman shall be placed on each gangway during the day from the time the gangway is lowered until it is raised.

4. A responsible person shall be deputed by the Local Government to ensure these measures being applied immediately the vessel is berthed.

T. BUTLER,
Secy. to the Govt. of Bengal.

Draft Notification.

In exercise of the powers conferred by sections 78 and 99 of the Bengal Irrigation Act, 1876 (Bengal Act, III of 1876), and in supersession of all previous notifications under those sections for the Sone Canals [except Notification No 148, dated the 20th June 1881, published at page 637 of Part I of the *Calcutta Gazette* of the 22nd June 1881, which shall remain in force for the purposes of rule 71 (*g*) annexed to the present notification], the Lieutenant-Governor in Council is pleased to make the following rules for the Sone Canals.

GENERAL CONDITIONS

1. The Collector, before awarding compensation under section 16 or 76 (*c*) or making a reference under section 17 of the Act, shall obtain the written opinion of the Superintending Canal Officer, which shall form part of the record of proceedings.

2. Except as provided in Act III (B.C.) of 1876 (the Irrigation Act) and these rules, no appeal shall lie from any order passed by a Canal Officer or the Special Deputy Collector in charge of the Revenue Division of the Sone Canals who has been vested with the powers of a Collector under the aforesaid Act. The Sub-Divisional Canal Officer, however, shall modify any order passed by him in accordance with the orders of the Divisional Canal Officer The Sub-Divisional and the Divisional Canal Officers and the Special Deputy Collector in charge of the Revenue Division of the Sone Canals, shall modify any orders passed by them in accordance with the orders of the Superintending Canal Officer. The Superintending Canal Officer is empowered, and expected, to exercise a general control over the proceedings of all Canal Officers and of the Special Deputy Collector, the Sub-Deputy Collectors, and all other officers attached to the above-mentioned Revenue Division of the Sone Canals.

3 It will be the duty of the Superintending Canal Officer to issue orders on the following points:—

I.—The limits within which water will be available during the *kharif* season—(*a*) for annual leases; (*b*) for leases for a term of years.

II.—The distributaries from which water will be supplied during the hot season.

III.—The distributaries from which water will only be supplied during the *rabi* season at the rate (*see* Schedule III) ordinarily charged.

IV.—On sufficient cause being shown, to prohibit the issue of permits for the irrigation of land in specified localities generally or during the *kharif* season only.

Such public notice as is practicable will be given of the instructions under this rule as long as is possible before they are enforced.

4. Appeals to the Collector under section 91 of the Act, other than those specially provided for in rule 37, will ordinarily be from an order passed by the Divisional Canal Officer. The Collector may, when the order passed involves (I) the alignment of a village channel, (II) the refusal of the Divisional Canal Officer to accept a block as suitable for the issue of a permit for *kharif* irrigation, require the Superintending Canal Officer to state his opinion in writing, which shall form part of the record of proceedings in the case.

ON VILLAGE CHANNELS

5. The Canal Officer shall prepare a list of channels which, previous to the 1st of April 1891, have been ordinarily used as village channels, and enter them in a register prepared in the manner prescribed in Part V of the Act.

6 A village channel which was constructed after the 1st of April 1891, or which had not ordinarily been used as a village channel before that date shall not be entered in the register except at the written request of the owners of it. Water shall not be supplied for irrigation during the *kharif* season through any channel other than one which has been entered in the register.

7. Village channels which may be constructed in future shall not as a rule exceed one mile in length; the length being measured in a straight line from the outlet to the boundary of the part of the village which the channel is intended to irrigate.

8. The sum fixed by the Canal Officer as rent under section 68 of the Act shall not be less than half an anna, and shall not exceed four annas per bigha assessed with water-rate.

ON LAMBARDARS.

9. In every permit issued under section 75 of the Act other than those issued under rules 18 or 19 following, the name of one or more persons shall be entered as *lambardar*, who will be responsible for discharging the duties mentioned below :—

I.—Obtaining signatures to applications and certifying to the correctness of the same.

II.—Attending and giving assistance in measuring land irrigated or proposed to be irrigated.

III.—Giving timely information to the Canal Officer or subordinate of any insufficiency in the supply of water and promptly reporting when the irrigation of the leased area on any channel is complete

IV.—Supervising the distribution of the water supplied through an outlet amongst the persons entitled thereto and reporting any misuse of the same.

V.—Being present when complaints are investigated by a Canal Officer or subordinate, and giving information required in connection with the same

VI.—Receiving *parchas* from the Canal Officer and distributing the same amongst the persons named therein.

VII.—Reporting before the 20th of October all cases in which crops have been injured by deficiency or irregularity of supply in the *kharif* season, so that these cases may be investigated before water-rates are demanded

VIII.—Reporting to the Collector or to such officer as he may appoint mutations in holdings in the case of leases for a term of years

IX.—Assisting the Collector by generally helping the collecting staff in the collection of water-rates.

(*See* also Superintending Engineer's Circular No. 7 of 1895)

10. In the case of leases for the season, the remuneration for performing the duties mentioned in clauses I to VII and IX of the rule immediately preceding shall be 2 per cent. on the assessments (excluding fractions of rupees, which shall be paid by the Canal Officer. The amount paid shall be calculated in rupees and annas only, pies being omitted.

11 In the case of leases for a term of years, other than those entered into jointly with contractors, the remuneration to be paid to the *lambardar* for performing the duties mentioned in clauses I to IX of Rule 9 shall be 3 per cent. yearly on the assessment of the year (excluding fractions of rupees), which shall be paid by the Canal Officer. The amount paid shall be calculated in rupees and annas only, pies being omitted.

12 The *lambardar* will be appointed by the Sub Divisional Officer in consultation with the applicants for the lease, and must be a substantial person having a beneficial interest in part of the land to be irrigated There is no objection to different *lambardars* being appointed to represent sections of the applicants, or to a number of persons being jointly appointed as *lambardars* on behalf of the whole of the applicants. In case the Sub-Divisional Canal Officer cannot agree with the applicants in the appointment of a *lambardar*, he shall nominate a *lambardar* for approval by the Divisional Canal Officer.

In those cases where an application is made by a contractor and cultivators jointly for a lease for a term of years, the *lambardar* shall be nominated by the contractor.

13. The Divisional Canal Officer may, for reasons which appear to him to be sufficient, and which must be recorded, remove a *lambardar* from his appointment, and in that case a new *lambardar* shall be appointed in the manner prescribed in the rule immediately preceding.

14 The Divisional Canal Officer may, with the consent of the *lambardar*, by a written order, of which the *lambardar* shall be furnished with a copy, transfer to him the duty of controlling the supply of water through an outlet, and may, at any time, by a written order, recall such order. *Lambardars* to whom such control is transferred shall exercise such power, subject to such general written orders as they may receive from the Sub-Divisional Canal Officer, and shall receive one per cent. on the assessment in addition to the percentages prescribed in Rules 10 and 11

15 The fees sanctioned to be paid to *lambardars* will only be disbursed if the duties specified have been satisfactorily performed. The Divisional Canal Officer may retrench the whole or any part of the fees payable by him in the event of this condition not being complied with. In calculating the fees payable, fractions of an anna will be excluded.

(*See* Superintending Engineer's Nos 3126—28 of 4th July 1896 with reference to retrenchments)

ON APPLICATIONS

16. Applications under section 74 of the Act for permits for irrigation upon leases for a term of years (Appendix I), or upon *kharif* season leases (Appendix III), shall be subject to the following conditions :—

I.—The application must be for a block of land having well-defined boundaries and so situated that adjoining lands will not ordinarily or probably be irrigated by water supplied for the land included in the application.

II.—The application must be in the form annexed to these rules, which states that water-rates will be paid on all lands contained in the block for which an application is presented, whether water or no water is required.

III.—The applications may be for a term of years, or for the season only—

(*a*) In case of application for the season only, the issue of the permit will not necessarily be delayed until the lands have been measured. The boundaries of the block must be stated in the application, which must be signed by, or by authority of, the cultivators of all the land included in the boundaries mentioned, and the approximate area in the occupation of each on the block must be specified. Water-rates will be charged on the areas in the block as found by actual measurement. An application for a permit for the season must be filed by the 1st September, but with the Superintending Engineer's sanction an application for a season lease may be entertained up to the end of the season.

(*b*) In the case of applications for a term of years, a permit will not be issued until the land has been measured and an application complete in every respect for all the land included in the block has been signed. All the leases within one group (a 'group' being defined as in Note II) shall be so granted as to expire on the same date. If water is required to be supplied before the application is completely signed in the manner specified above, an application for water for the season must be made, which will be cancelled on a permit for a term of years being issued.

NOTE I.—Superintending Engineer's Nos. 2940—42 of 26th June 1896 directs that "if applicants for a long-term lease, which is not signed before the 15th August, decline to apply for a season lease under Rule III*b* by that date, they should be informed that the long-term lease will not be granted during the year."

NOTE II.—A group is defined as consisting of a certain area of country mapped out in accordance with the features of the ground, natural or artificial.

NOTE II.—The leases granted for a term of years in a group will take effect from 1st April 1910.

(*c*) Notice that a permit for a term of years is required must be given by the 1st of April, but with the Superintending Engineer's special sanction the time may be extended where reasonable cause for the delay in filing the application for a long-term lease can be established. No permit will be issued unless the application is completely signed by the 30th of November, or, with the special sanction of the Superintending Canal Officer, by the 1st of March following.

NOTE.—Superintending Engineer's Nos. 1649—51, dated 13th April 1892.

IV.—With the special sanction of the Superintending Canal Officer an application may be made for an addition to a lease for a term of years, which, if granted, shall be considered as part of the original lease and terminate therewith.

16A. Applications (Appendix IVC) for a single watering between 26th June and 25th October may be entertained if water is available after meeting the demand for the areas leased under a term of years or for the season. The applications will be subject to the conditions prescribed for the *rabi* and hot weather seasons: see rule 17 below.

17. Applications for irrigation in the *rabi* season, 26th October to the 25th March, and the hot weather season, 25th March to the 25th June (Appendices IVA and B), will be subject to the following conditions:—

I.—The approximate areas of land for which water is required must be stated in the application, which must be signed by the occupiers thereof. It must be stated in the application that the water-rates will be paid on the area actually irrigated.

18. Applications for the sale of water by volume for purposes of irrigation will only be entertained on condition that half the amount chargeable is paid to the Sub-Divisional Canal Officer when the application is filed, and that a bond is executed in the form attached to these rules as Appendix V signed by substantial persons pledging themselves to pay such sums as will in the aggregate make up the remainder. The bond will not have reference to the area to be irrigated, but will be in consideration of a particular outlet being kept open for a specified time, and the sums mentioned therein will be recoverable on the certificate of the Canal subordinate that this condition has been fulfilled. Water will be supplied under this rule from the 1st of July to the 31st of October only.

19. Applications for the sale of water by volume for filling *aharas* will be in the form attached to these rules as Appendix VI. The entire charge will be payable in advance. Water will be supplied under this rule from the 1st of November to the 25th of March only.

ON PERMITS

20. All permits for the use of water issued under section 75 of the Act shall be subject to the following conditions:—

I.—That the water is supplied for the sole purpose of irrigating the land mentioned in the application. The term "irrigating" includes the right to drain (*nigar*)

at the proper season of the year, previous notice being given to the sectional officer that the outlet is required to be closed Under colour of *nigaring*, however, no right is conferred to irrigate culturable land for the purpose of sowing a crop or maturing any existing crop

II.—That water will be supplied at the level at which it is ordinarily maintained in the distributary from which water is taken off, and that no earthen bunds or other works will be constructed to raise the level of the water in the distributary. No right to flow irrigation is conferred unless existing appliances admit of it

III.—That a *lambardar* shall be appointed in the manner specified in Rule 12 to represent the interests of the cultivators and to perform the duties mentioned in Rule 9.

IV.—That the village channel from which water is supplied is kept in a proper state of repair, so that water shall not be wasted

V.—That water-rates are paid when due.

VI.—That water supplied for the irrigation of a specified block of land shall not, under colour of the permit, be utilized for the irrigation of land beyond the boundaries specified in application.

NOTE.—Where these conditions are infringed, appropriate penalties or disabilities to the extent specified in the Act or these rules will be enforced.

21. A permit shall not be issued where, in the opinion of the Canal Officer, waste is likely to occur. In the order refusing a permit on this ground, the manner in which it is apprehended that waste will occur shall be stated.

22. Permits for irrigation upon leases for a term of years (Appendix VIII) or upon *kharif* season leases (Appendix IX) shall be issued under the following conditions:—

I.—The land to be irrigated must form a compact block defined by well-marked boundaries of such a nature as clearly to distinguish leased from the adjoining unleased lands, and to preclude the possibility in ordinary circumstances of water escaping from the boundaries without obvious wilful cutting or demolition. They must be maintained in the same state of repair during the currency of the lease as existed when the permit was granted and also be so situated that unleased lands will not be ordinarily or probably irrigated by water supplied for the land included in the block. The boundaries must be mentioned in the application for a permit for the season, and in the notice referred to in Rule 16(*c*), when a permit for a lease for a term of years is applied for.

II.—The Canal Officer may exclude lands included in the block not irrigable by flow or for which canal water is ordinarily not required. In the case of permits for a term of years, the block must be not less than 50 bighas in area. In cases where the Divisional Canal Officer considers it advisable to grant a permit to a block of less area than that mentioned above, the previous sanction of the Superintending Canal Officer must be obtained. No permit for a term of years shall be issued unless the owners of the village channel from which water is to be obtained have been registered and the channel itself is in a good state of repair; such as to fit it for the conveyance of water without wastage occurring. Such leases will not be issued unless it is known from the experience of previous years' irrigation that a sufficient supply of water is always available, and that the quantity required is not excessive.

III.—A permit for a lease for a term of years may be cancelled by the Superintending Canal Officer with effect from a date to be specified in the order for good cause on the application of all the signatories thereto.

IV.—Permits for the season will be issued under less favourable conditions as to situation, soil and quantity of water available; it will not be necessary that the owner of the channel should be registered, but the channel itself must be entered on the register.

V.—Water-rates will be levied on the areas of the blocks specified in the permits, and measurement of the areas actually irrigated will not be necessary.

22A. Permits (Appendix XI) for a single watering during the *kharif* season from 26th June to 25th October may be issued under the conditions prescribed in Rule 23 (I) (II) (III) below, if water is available after meeting the demands for the areas leased under a term of years or for the season.

23. Permits for irrigation in the *rabi* and hot weather seasons, 25th October to 25th June (Appendix X), will be issued on the following conditions:—

I.—The applicants will undertake to give the *lambardar* notice to close the outlet as soon as the area requiring irrigation has received a sufficient supply of water.

(*b*) to declare that he may exercise the said powers during the period for which he continues to hold the office of President of the said panchayat.

2. So much of notification No. 2172P.D., dated the 9th October 1909 (published at pages 1391 to 1394 of Part I of the *Calcutta Gazette* of the 13th October 1909), as conferred upon Babu Brindaban Misra as President of the panchayat of Nuapur-Union No. 1, in outpost Anantapur, in the district of Balasore, the powers of a Magistrate under sections 64, 127 and 128 of the Code of Criminal Procedure, 1898, is hereby cancelled.

IRRIGATION DEPARTMENT.

The 23rd May 1911.

No. 5.—Notification.—Whereas it appears to the Lieutenant-Governor in Council that injury to the public convenience has arisen, and that further such injury is likely to arise, from the obstruction of that portion of the Bara Alanka river between Mauza Sahara, Pargana Harishpur and the point where it falls into the Patuli river in Mauza Sahapat, Killa Harishpur, measuring in length 26,400 feet, by the erection therein of a cross bund at Mauza Goleswarpur and Barimul, Killa Harishpur, belonging to Kumar Hrishi Kesh Laha and Bhagaban Sahu:

When such alterations are made in a demand statement appertaining to a lease for a term of years, a copy of the alteration statement shall be sent to the Divisional Canal Officer.

63. In cases where sums due on account of water-rates cannot be collected owing to the death, bankruptcy or absconding of the defaulter, the amount which is non-realizable may be written off as irrecoverable on the authority of the Collector. A detailed list of all sums so written off shall be forthwith sent to the Superintending Canal Officer. In other cases the sanction of the Commissioner of the Division must be obtained, through the Superintending Canal Officer, to admit of demands being written off under this head

(*e*)—No tank shall be so filled unless the village channel used to fill it shall be shown to the satisfaction of the Sub-Divisional Canal Officer to be in a sound condition when the application is made.

(*f*)—The privilege herein accorded may, by written order of the Divisional Canal Officer, subject to revision by the Superintending Canal Officer, whose decision shall be final, be suspended for twelve months for breach of any of the above conditions.

Such an order shall have effect from the 25th June next ensuing, and two months' notice at least must be given to the *lambardars* for the information of the cultivators.

ON THE SUPPLY OF WATER.

26. I.—Any Canal Officer may, in the case of pressing emergency, stop the supply of water to any canal or distributary. If such order is passed by an officer below the rank of a Divisional Canal Officer, it shall forthwith be reported to the Divisional Canal Officer, and if the stoppage exceeds five days in duration, to the Superintending Canal Officer.

II.—The Sub-Divisional Canal Officer may, by written order under section 76*a*, stop the supply to any village channel when he is satisfied, after inspection by himself or by one of his subordinates, that either it, or, in case the channel is supplying a long-term lease, the boundaries of such lease are not maintained in proper repair. Such order shall be recorded in the Sub-Divisional office.

III.—No person shall be entitled to be supplied with water until the village channel has been put in a proper state of repair in accordance with directions given by the Sub-Divisional Canal Officer.

IV.—The Canal Officer or any of his subordinates may temporarily close an outlet supplying a village channel from which unauthorized irrigation is, at the time the outlet is closed, being carried on.

27. The Divisional Canal Officer may close the outlets in rotation as he may consider necessary. The periods of such closures must be notified to the *lambardars* concerned.

28. No water shall be supplied nor shall any person be entitled to a supply of water until a permit signed by a Canal Officer authorized to sign a permit has been signed and issued.

29. The Canal Officer will be responsible that the supply through the outlet is in the *kharif* and *rabi* seasons maintained in accordance with the requirements of the crops. In both seasons it will be the duty of the *lambardar* to inform the Canal Officer or subordinate when the area under lease has been fully irrigated, so that the outlet may be closed, or if he has, under rule 14, been given charge of the outlet, to close it himself.

ON DEMAND STATEMENTS.

30. The statements of the amounts demandable for water rates leviable under the rules in force shall be prepared under the supervision and stamped signature of the Divisional Canal Officer, in such form as shall from time to time be sanctioned by the Lieutenant-Governor

31. The demand statements for water-rates due under leases for a term of years shall be prepared at the same time as the application, and a copy thereof shall be given to the *lambardar* as well as a *purcha* for each signatory to the lease with the permit No further notice of demand shall be given during the currency of the lease.

32 The demand statement for water-rates due under a lease in the *kharif* season shall be prepared either before the permit is issued, or as soon as conveniently may be after its issue, and shall, without reference to the land having been actually irrigated up to that time

or not, show the water-rates due by each person whose land is included in the application. Demand statements (*parcha*) showing the sums due from each applicant shall be sent to the *lambardar* for distribution, and no further notice of demand shall be given.

33. For irrigation during the hotweather or *rabi* season, the following procedure shall be followed:—

I.—The area irrigated in any village shall be measured by an amin appointed for the purpose. The *khasra* shall be signed by both the amin and the *lambardar*, who shall be present at the measurements. If the *lambardar* is not present, the amin shall arrange that at least two respectable cultivators shall be present and enter their names in the *khasra* prepared by him.

II.—When the measurement is completed, the *khasra* shall be forwarded to the Sub-Divisional Canal Officer, who shall prepare the demand statement (*khatiani*) with all possible despatch. Copies of extracts of the demand statement affecting each separate cultivator (*parchas*), signed and sealed by the *zilladar*, shall, as soon as prepared, be forwarded to the *lambardar* for distribution amongst the persons charged. The *lambardar* shall grant a receipt for the *parchas* forwarded.

III.—If the *lambardar* is not present, or declines to grant a receipt for the same in the prescribed form, the Sub-Divisional Canal Officer shall make other efficient arrangements for serving each person assessed with a *parcha* showing the amount due from him. *Parchas* may be sent by post.

34. Objections to the demand statements prepared in accordance with the preceding rules 31, 32 and 33 may be presented, either personally or through the *lambardar*, to the Sub-Divisional or Divisional Canal Officer, who shall thereupon, after such enquiry as he may consider to be necessary, pass orders on the same. A copy of the order passed (which may be sent by post) shall be served on the person making the objection. Objections to the demand addressed to the Collector shall be referred for the orders of the Divisional Canal Officer.

35. Objections to the demand statements must be presented within thirty days of the date on which the *parcha* was received by the *lambardar*, but this period shall be extended where reasonable cause for delay can be established.

36. The objections may be in a form, which will be sold for half-an-anna at all Canal offices, giving instructions as to the particulars required to admit of the objections being readily investigated; but any form will be accepted provided it clearly states the name or names of the persons objecting, the crop, and the year for which the charge is made, and the demand from each cultivator to which objection is taken.

37. Any person not satisfied with the order passed by the Canal Officer under rule 34 may file an application of appeal to the Collector under section 91 of the Act. Such application must be accompanied by a copy of the order appealed against. The Collector shall thereupon, after considering the records of the case, pass such order as he may think fit, and shall meanwhile have discretion to suspend collections by a written order in cases where it may seem advisable to do so.

38. When the order appealed against to the Collector is that of a Sub-Divisional Canal Officer, the proceedings shall be called for through the Divisional Canal Officer, who may record thereon any remarks he may think fit. The papers shall not be detained for the purpose of enabling the Divisional Canal Officer to make further enquiries which, however, may be directed by the Collector on the suggestion of the Divisional Canal Officer or on his own motion.

39. Applications for mutations of names in leases for a term of years shall be made to the Collector; if addressed to the Canal Officer they shall be referred to the Collector for disposal. Applications for alterations in long-term leases on account of wrong assessment shall be made to the Divisional Canal Officer; if presented to the Deputy Collector they shall be referred to the Divisional Canal Officer for disposal.

39. (*a*) When the mutations of the names of rate-payers are found to be more than 30 per cent. of the whole the Deputy Collector will request the Divisional Canal Officer to prepare and forward a revised demand statement. The same rule applies for other crops.

ON WATER-RATES.

40. Water-rates imposed under section 79 of the Act for the irrigation effected in the hot weather or *rabi* seasons, shall be assessed by the Canal Officer at rates which shall be fixed by the Divisional Canal Officer, and which shall not be greater than those shown in the following schedule:—

	Flow or Lift.	
	Rate per bigha.	Rate per tenth of a bigha.
	Rs. A.	
For water used in an unauthorized manner	6 4	10

In the *kharif* season water-rates shall be imposed by the Divisional Canal Officer under section 79 *only* after the sanction of the Collector has been obtained to make a detailed measurement of the land irrigated without authority.

NOTE Areas irrigated by *bona fide* surplus water drained off from a leased area shall not be assessed *Bona fide* is defined as water drained off the fields while the outlet remains closed.

The Collector's sanction is not in itself authority for the imposition of water-rates—it merely authorizes proceedings being instituted. The rates to be charged in the *kharif* season will be subject to the same maxima as in the hot weather and *rabi* seasons. Persons using water without a permit shall, unless exempted by section 74 of the Act, be charged water-rates according to the season in which water is used, at the rates specified in this rule.

41. Charges for waste of water imposed under section 80 of the Act shall be at the rates fixed in the rule immediately preceding, and be subject in the *kharif* season to the same condition as regards sanction by the Collector as is required by that rule; where a tank or *ahara* has been filled, a charge of Rs. 5 per thousand cubic yards may be made in lieu of an acreage charge

42. Water-rates assessed under sections 78, 79 or 80 of the Act shall be paid on or before the dates mentioned below:—

For leases for a term of years entered into after the 1st January 1898.	One kist on or before the 15th January.
Season leases—	
Under Schedule No. II ...	For rice and sugarcane on or before the 15th December. For a single watering, on presentation of the demand.
Ditto No III ...	*Rabi* and sugarcane on or before the 5th April
Ditto No. IV ...	Hot weather irrigation on or before the 1st July
Assessments under section 79 of the Act or under Rule 40.	On presentation of the demand
Assessments under section 80 of the Act	
Water supplied by volume between the 1st of September and 31st of October	One moiety before the outlet is opened, the other moiety on or before the 15th December.
Water supplied by volume to fill *aharas*	The whole amount before the outlet is opened.

The Divisional Canal Officer shall forward the demand statements of leases under Schedule No. II to the Collector as soon as they have been prepared in accordance with rule 32 He will forward these and all other demand statements as soon as they are ready and will endeavour to send them at least fifteen days before the latest dates fixed for the payment of the water rates, but accuracy in the individual charges shall be regarded as of more importance than a rigid adherence to dates

43. Where lands are held on a *bhaoli* tenure, the entire water-rates assessed under section 78 of the Act shall be demandable from the occupiers of the land assessable, but at the written request of the *bhaoli* owner, in the form, Appendix VII, which may be presented to the Divisional Canal Officer or to the Collector, the water-rates shall be recovered from the cultivators and the person or persons in receipt of the *bhaoli* rents in the same proportion as the produce is divisible amongst them. The demand statement shall be made out by the Divisional Canal Officer in the name of the cultivators, any necessary modification therein, owing to a request made by a *bhaoli* owner under this rule, being carried out by the Collector. But on lands under Government management half the rates should be paid by the landlords, and in other cases any influence which the Collector may possess should be used to make the zamindar consent to this equitable arrangement.

44 In the case of lands held under a *bhaoli* tenure being assessed under section 79 of the Act, the whole of the persons deriving benefit therefrom shall be assessed in the same proportion as the produce is divisible amongst them.

ON REMISSIONS.

45. The water gauges on distributaries or other channels shall be held to give authoritative data for all calculations of discharge required to verify claims for remission of water-rate on account of failure of supply.

46. Claims to remission of water-rates under section 76(*b*) shall only be admitted on proof of actual loss caused by failure of supply. On proof of such loss, the Divisional Canal Officer may remit the whole or any part of the rates. All applications for remission of water-rates shall be made in the manner provided in rule 34 and not less than twenty days before the crop is cut The Divisional Canal Officer, with the previous sanction of the Superintending Canal Officer, which sanction may be delegated to any Divisional Canal Officer, when the crop of an individual cultivator of a season lease has failed to the extent of losing twelve annas or more of its value in the rupee, may, as a matter of grace, grant remission up to 10 per cent. of the area assessed against the cultivator, notwithstanding that the deficiency in the crop is due to causes other than through partial or total failure in the supply of canal water.

47. Before awarding compensation under section 76(*c*), the Collector shall obtain the written opinion of the Divisional Canal Officer, and such opinion shall form part of the record of the proceedings. All applications for compensation under section 76(*c*) must be made not less than twenty days before the crop is cut.

48. Notwithstanding anything contained in these rules, the Superintending Canal Officer may, should he consider the circumstances of the case require it, under such general instructions as he may from time to time receive from Government, remit, under the head "Extraordinary", so much of the water-rates as are in excess of ten annas a bigha. But no such remissions shall be claimable as a right, nor shall any person be entitled to receive an order on an application for remission under this head, which will ordinarily only be made on the representations of Divisional Canal Officers.

49. A remission statement signed by the Superintending, or Divisional Canal Officer, shall be sufficient authority for a refund by the Collector

52. A contractor (or in case there be more than one, each contractor severally and jointly) shall use due diligence in the collection of the water-rates specified in the agreement from the cultivators who have applied for the water supplied. In the case of his failure after due diligence to collect, he shall, within thirty days of the rates becoming due, submit to the Collector a list showing the names of the defaulters with the sums due from each, and the Collector shall thereupon proceed to realize the amount due from the said defaulters according to law.

53. A contractor (or in case there be more than one, each contractor severally and jointly) shall be responsible for all sums payable on the agreement, except such sums as he may satisfy the Collector that he has been unable to collect after using due diligence, and shall be entitled to a deduction of 5 per cent on all sums collected by himself.

54. In the case of a lease entered into under an application in the form given as Appendix I, a contractor may subsequently be appointed by the Collector with the written approval of the Superintending Canal Officer Such contractor must, for the whole term of the lease, have a beneficial interest in some part of the land included in the application, and must sign an application in the form given as Appendix IIA. 55. The contractor appointed under rules 50 and 54 may, but shall not necessarily, be *lambardar*. The *lambardar* will in all cases be appointed by the Canal Officer under the provisions of Rule 12, and shall be remunerated at the rates specified in Rules 11 and 14, subject to the conditions mentioned in Rule 15.

56. The contractor may, if he prefers, in which case it shall be so stated in the application, take the responsibility of collecting the entire sum due under the application, in which case he shall be entitled to a deduction of 2½ per cent on all sums collected by himself in addition to the deduction of 5 per cent to which he is entitled under rule 53, *i.e.*, to a total deduction of 7½ per cent.

57. No steps shall be taken to prepare a joint application by cultivators and a contractor until the written assent of the Collector to the proposed contractor has been received, nor shall the Collector take any steps towards the appointment of a contractor under rule 54 until the written assent of the Superintending Canal Officer has been received. The Collector may, before approving of a contractor under this rule, require him to give security for the due performance of the contract.

58. A contractor may resign his interest in the lease by giving notice to the Divisional Canal Officer three months at least before the 25th June next following, in which case his connection with the lease shall cease from that date, and the Sub-Divisional Canal Officer shall proceed to appoint a *lambardar* under rule 12, and the Collector to realize water-rates due directly from the applicants. The Divisional Canal Officer may, at the instance of the Collector, remove a contractor who fails to use due diligence in making collections. In such cases three months' notice at the least before the 25th of June next following shall be given, and the removal shall take effect from that date The Collector may, under the conditions and procedure specified in rule 54, appoint a new contractor in place of a contractor who has resigned.

59. With the written approval of the Superintending Canal Officer, a contractor may measure and prepare demand statements for lands irrigated in the hot weather, for which applications in the prescribed form have been filed by him. Such demand statements shall be forwarded to the Sub-Divisional Canal Officer, who shall thereupon proceed to deal with them as if they had been prepared by himself.
